

BN Studio Product Catalog

Overview

BN Studio is a cloud-based Software as a Service (SaaS) platform developed by Bytetronik Inc. that enables creators, podcasters, broadcasters, educational organizations, businesses, and media networks to manage livestreaming, media assets, creator operations, and digital broadcasting from a centralized platform.

BN Studio combines media management, streaming infrastructure, creator tools, billing management, and multi-tenant operations into a single unified control plane.

Core Features

Multi-Tenant Management

Manage multiple brands, channels, organizations, or media networks from a single platform.

Livestream Management

Monitor and manage livestreaming operations across multiple tenants and channels.

Media Library

Upload, organize, and manage media assets from a centralized interface.

Storage Management

Monitor storage utilization, media health, and asset growth across all tenants.

Billing & Subscription Management

Integrated subscription billing powered by Stripe.

Operations Center

Platform-wide monitoring, alerts, and operational visibility.

User Management

Manage administrators, staff, creators, and tenant-level users.

Integrations

Support for third-party streaming, media, storage, and workflow integrations.

Ideal For

• Podcasters • Content Creators • Educational Organizations • Churches • Sports Organizations • Independent Media Networks • Production Companies • Businesses Running Internal Media Platforms

Developed By

Bytetronek Inc. Automotive Technology • Media Platforms • Digital Broadcasting
